World-class faculty

Berkeley faculty are internationally recognized leaders in the study of economic, social and technological forces shaping global markets. Our faculty are pioneers and active practitioners in the fields of entrepreneurship and innovation; they bring decades of experience, and a vast network of connections all over the world.

Berkeley faculty bring real-world methods and frameworks for applying research to business. Participants engage with faculty one-on-one throughout their experience in the program.

Faculty

The Lester Center for Entrepreneurship, Garwood Center for Corporate Innovation, and the Program in Open Innovation are driving new concepts in product and service design, innovation leadership and venture capital. They attract speakers and guests from the Bay Area business community and around the world.

Resources

Institutes and Centers of Innovation

There’s a reason why Berkeley is home to over 100 Nobel Laureates.

Berkeley is home to incubators that stimulate future leaders and innovators both on campus and around the world.

Associated programs: Open Innovation Program, The Lester Center for Entrepreneurship.

Berkeley SkyDeck is a partnership between the College of Engineering and the Haas School of Business, intended to incubate new businesses.

The Berkeley Difference

Berkeley has a long history as the epicenter for scientific, social and technological innovation, further stimulated by the nearby Bay Area business ecosystem.

Executive Education programs at Berkeley incorporate non-traditional learning methods including prototyping, workshops, simulations and online training. The result is a dynamic, unforgettable learning experience aligned with your individual and company goals.

Ecosystem

Our program incorporate site visits to Bay Area companies. Participants can experience different work environments and hear firsthand how some of the world’s top companies are solving their own business challenges.

We leverage our Silicon Valley network by including business leaders in our program panels and sessions; their expertise enhances the programs’ core business curricula.

Immersion into the Bay Area business environment

Around campus, innovation flourishes in the Schools of Engineering, Public Policy, Law, Life Sciences. The Center for Executive Education brings these world-class programs into our truly multidisciplinary education.

Berkeley is a world-renowned research institution and drives cutting edge advances in technology, science and policy.
