DATA SCIENCE: BRIDGING PRINCIPLES AND PRACTICE

Program Topics

The Data Science: Bridging Principles and Practice program curriculum covers the following topics:

- Module 1 | Probabilistic Decision Making
- Module 2 | Creating Sample Data
- Module 3 | Testing Hypothesis
- Module 4 | Extrapolating Information from Sample Data
- Module 5 | Basic Regression Models
- Module 6 | Advanced Regression Models
- Module 7 | Forecasting Machine Learning
- Module 8 | Building Effective Data Science Teams
